PIPE REPAIR BANDAGE

SAVE THOUSANDS ON COSTLY DOWNTIME

Rapp-it is the Ultimate Pipe Repair System for your temporary emergency pipe repair needs. It's simple to use with no mixing or measuring required. You simply immerse the bandage in water for 10 to 20 seconds and then apply by wrapping around the damaged pipe area. A successful repair can be achieved in 30 minutes.

Rapp-it Pipe Repair System includes a woven fiberglass bandage impregnated with a water-activated poly-urethane resin. Rapp-it is a time and cost effective pipe repair solution which significantly reduces down time.

Tailored to industrial specifications, the RAP304 was created for pipes with a diameter greater than 150mm, requiring less application time and resulting in a more effective repair.

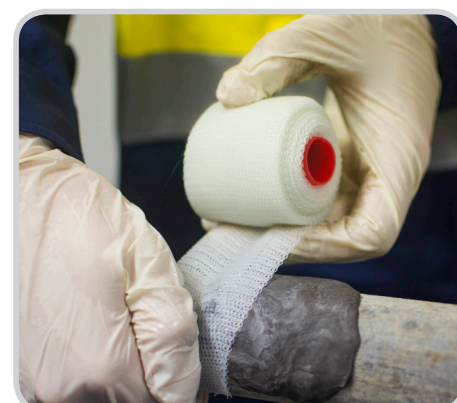

The RAP304 is the largest of Rapp-it's five available sizes, ranging from 50mm to 100mm wide and 3.6m to 9m long.

Each Rapp-it Bandage comes with Rapp-it Steel Putty, which is a hand mixable, steel-reinforced epoxy putty that can be moulded into any shape to fill cavities, cracks or holes for a more successful repair.

DON'T RISK IT USE RAPP-IT!

SPECIFICATIONS

- **CERTIFICATIONS**
NATO Certified, Potable Water (AS/NZS 4020:2018)
- **RESIN MAKE UP**
Water-activated Polyurethane
- **HEAT RESISTANCE**
150° Celsius
- **BONDS TO MOST PIPES**
Steel, Polypipe, PVC, Fibreglass, Copper
- **SETS 20-30 MINUTE CURE**
Sets under water
- **CHEMICAL, FUEL AND OIL RESISTANT**
Acid lines, Oils, Gas, Sea water, MDISC
- **STRENGTH QUALITIES**
Internal Pressure up to 2500kPa (360psi)
